

been notified again that you are still thinking about messing with states rights and weakening laws that are working but need strengthened like Indianas. before our no call law i was getting 6 to 20 calls a day. now i'm getting 1 to 6 calls a week which is to many ads that i have to pay for [now some of them leave a recorded message on my recorder]. or wake me from a nap and hang up. [i'm disabled] i want no calls trying to sell/give me something that costs or get my vote. i pay the phone bill and i should be able to decide who uses my phone. and telemarketers do not have my permission, or beggers[send us a donation] send it to me i missing a leg a leg. or politicians. if i don't know you or you are recomended by a friend don't call! at all ever! F.G. McNabb
